Quinault Beach Resort and Casino Partners With Plasma Air to Improve Indoor Air Quality on Its Gaming Floor

Plasma Air's Innovative Bipolar Ionization Technology Attacks Odorous and Harmful Airborne Pollutants

Stamford, CT, USA, August 22, 2017 – [Plasma Air International](#), the leading innovator in indoor air quality solutions, today announces [Quinault Beach Resort and Casino](#) will utilize Plasma Air's innovative [bipolar ionization technology](#) to help Quinault achieve a healthier indoor air environment in its newly expanded casino floor.

Located in Ocean Shores, Washington, Quinault Beach Resort is in the midst of a \$25 million renovation, including the expansion of its gaming floor. As a tribal casino, Quinault Beach is exempt from civil smoke-free laws. Quinault, which researched how to ensure healthy indoor air quality for both smoking and non-smoking customers and employees, found Plasma Air's solution met its requirements and reached out to the company.

Plasma Air's air purification products use breakthrough bipolar ionization technology to help casinos eliminate airborne pollutants, including smoke particles and odorous Volatile Organic Compounds (VOCs). The technology improves overall Indoor Air Quality (IAQ) throughout the facility to create a healthier and more enjoyable environment for both customers and personnel.

"In adding 70 percent more casino space as part of our renovation project, Plasma Air understood the need to maintain healthy indoor air quality and maximum comfort for the benefit of our customers and employees throughout the expanded facility," notes Don Kajans, General Manager and CEO of Quinault Beach Resort and Casino. "Since installing Plasma Air's bipolar ionization system, we've been able to eliminate the lingering effects of indoor smoking, reducing complaints from customers regarding tobacco smoke while receiving enthusiastic and positive feedback."

"Plasma Air is focused on helping its customers experience a healthier, more satisfying environment," comments Larry Sunshine, President, Plasma Air. "Almost immediately upon installation, the Quinault Beach Resort and Casino achieved improved air quality, resulting in longer stays and playing time by its customers."
